Art Unit: 1774

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3 and 5, drawn to a product.

Group II, claim(s) 4, drawn to a process.

- 2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature (STF) of group I is the optical diffusion coefficient and the reflectance. The foregoing STF is no present in group II. Hence, Lack of Unity is held by the Examiner in accordance with PCT rule 13 and 37 CFR 1.475.

 3.
- 4. During a telephone conversation with Cassandra Swain on 2/9/06 a provisional election was made without traverse to prosecute the invention of group I, claims 1-3 and 5. Affirmation of this election must be made by applicant in replying to this Office action. Claim 4 is withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.
- 5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 1774

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that

form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

- 7. Claim1 and 3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Fujiwara (US 4,409350).
- 8. Fujiwara teaches acrylic fibers having a glossiness (reflectance) and transparency (optical diffusion coefficient) comprising a polymer composition of 30%-70% weight acrylonotrile, 30-70% by weight halogen containing monomer, and up to 10% by weight of an olefin monomer having styrene sulfonic acid group in any amount. See col. 2 lines 20-52, for example. The Examiner has a reason to believe that Fujiwara acrylic fiber inherently contains the claimed optical diffusion coefficient and reflectance due to the same structural identity (composition, glossiness, and transparency).
- 9. Claim 2 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Also remove the phrase "like" from claim 2 line 2.

Application/Control Number: 10/522,710 Page 4
